1. The Malapanew Foundry in the Opole (R52/Q66) District, southeast of Radom (Q19), recently began the production of ingot steel. This foundry has five electric furnaces capable of turning out 1,500 tons of steel per month, and one Marten blast furnace of similar capacity, which is ready to be put into operation. Up to 1 September 1947, the plant had produced 3,370 tons of ingot steel, 708 tons of steel castings, and technical oxygen valued at 7,000,000 zloty.
2. The Stalowa Wola Works south of Rozwadew (R51/Q70), in southern Poland, is producing spare parts for automobiles, presses and cutting machines for the metal industry, milling machines, reamers, and pumps and rock drill installations for the oil industry. This plant, a former armament works, was about thirty percent damaged during 1944, but reconstruction started immediately after the war. The director of the factory is Eng. Kowalewski.
